

Remark

Applicants respectfully request reconsideration of this application as amended. Claims 1, 16, 25, 33 and 64 have been amended. No claims have been canceled. Therefore, claims 1-68 are now presented for examination.

35 U.S.C. §102 Rejection,

Bruckert et al.

The Examiner has rejected claims 1-68 under 35 U.S.C. § 102(b) as being anticipated by Bruckert et al., U.S. Patent No. 5,355,516 ("Bruckert"). In his Response to Arguments in the Final Office action of June 15, 2004, the Examiner makes two responses which Applicants discuss below.

"Bruckert discloses an assignment message including specific parameters (description) for determining specific frequencies/ and slots (channel) for a MS (user terminal). Note that, the channels are assigned for multiple MSs (user terminals)."

Bruckert discloses a CCCH on the downlink primary channel that is provided for within GSM recommendations. According to Bruckert, the CCCH provides the user MS with the specific parameters necessary to unambiguously determine the specific frequency and slot in which information between the BTS and MS may be exchanged. In this section, Bruckert is clear that the parameters are those necessary for the one MS to communicate. The claims have been clarified to recite that the description of the present claims is for all of the channels of the radio communication system available for

communicating between the base station and any user terminals that are registered with the base station.

Conclusion

Applicant respectfully submits that the rejections have been overcome by the amendment and remark, and that the claims as amended are now in condition for allowance. Accordingly, Applicant respectfully requests the rejections be withdrawn and the claims as amended be allowed.
